

Barrel Clamp

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic accessory is actually used on lift trucks to compress objects that you would like to transport utilizing the forklift. Typically, they're utilized in order to paper rolls, barrels, and handle kegs, along with some barrel clamp designs having the ability to revolve the load. For example, the revolving function enables the one operating the forklift to slot in a vertically stored paper into the horizontal intake of a printing press.
