

Clark Forklift Parts

Clark Forklift Parts - Currently, there are at least 350,000 Clark forklifts performing worldwide, and in excess of 250,000 in use in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 particular parts designed for 20 unique models of forklifts and automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark's exceptional Parts Distribution Stores are conveniently situated in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations worldwide, dealer representation in over 80 nations and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling industry.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is currently a customary feature on every forklift.

Clark has a relentless mission to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has chosen the very economical and advantageous structure of "Lean Manufacturing" for its assembly plants and application of resources. This structure was established to acknowledge the most effective approaches of manufacturing plant management and ensuring maximum proficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The contemporary value engineering agenda combines progressive product development and provides improved client support and service within the industry.
