Doosan Infracore America is the fastest growing forklift business in the North American marketplace, due to their consistency in retaining a high degree of customer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. lift Truck division situated in Cleveland has a skilled team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a nationwide equipment expansion project. Early product sales of this industrial equipment focused on large business groups, the armed services and on state-run firms. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of significant expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling industry. This project proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a global sales system and started exporting designs they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international markets.
